Projects

Tag! You're It!   Oct. 2015 – Feb. 2016

An Android application used to play tag with your friends. I was the sole programmer and used a remote linux server to host a MySQL database and PHP requests.

Project Runner   Sep. 2015 – Dec. 2015

A simple Android application to play our version of Temple Run. It was written in Java and C/C++ using the SDL libraries and utilizes an automatic build system with Apache Ant.

Perspective Rectifier   Feb. 2015 – Apr. 2015

A java application that uses linear algebra to change the perspective of an image.

Work Experience

KV Consultants, Inc   Chandler, AZ   May 2015 – Aug. 2015

I worked as a User Interface Development Intern for KV Consultants, Inc on a project for the state of Arizona. I made use of the Bootstrap framework as well as jQuery libraries and AngularJS JavaScript framework.

Education

University of Advancing Technology   Tempe, AZ   Aug. 2013 – May 2016

Degree: Bachelor's of Science in Advancing Computer Science   **GPA:** 3.92
